FEATURED PRODUCT

Keep your CPAP clean with SoClean

It's important to clean your CPAP daily to avoid mold and bacteria build up that can make you ill. Thankfully cleaning doesn't have to be time or labor intensive. Make it easy with **SoClean** – a device that cleans your mask, reservoir and hose with no disassembly.

To use the device, simply connect the hose to your machine and place the CPAP mask inside. **SoClean** pumps activated oxygen throughout the entire device. This provides a deep clean to your CPAP machine and eliminates germs.

Save yourself the time and trouble of daily cleaning with **SoClean**!

EMPLOYEE OWNERS

These clinicians are available to answer questions and assist people with CPAP/BiPAP and other respiratory concerns.
